

BioRemove COD

Premium broad-use COD reduction for demanding wastewater systems

BioRemove COD is a premium biological formulation for demanding industrial and municipal wastewater applications. It offers a diverse set of microorganisms that target a wide range of organics found in a variety of industries. BioRemove COD delivers the broadest range of biological activity and helps maintain wastewater system compliance and control.

Features

- Enhances BOD/COD removal
- Promotes floc formation
- Improves settling
- Broad consortium of microorganisms for diverse organics
- Strengthens system stability
- Helps maintain compliance in highly variable or complex waste streams
- Premium formulation for demanding applications

Available In

11.35 kg (25 lbs.) Item #WTP959RP6

25- 1 lb. (453 g) Pouches Item #WTP959RP5

Directions for Use

Dosing rates are dependent on flow, loading, and content of the wastewater. Please contact your EnviroZyme distributor for application-specific dosing recommendations.

Tech Specs

Bacteria Type	Non-Pathogenic Microbes
DSL	No
Physical Form	Powder
Fragrance	Characteristic
pH	6.0 - 9.0
Temperature Range	20 - 40 Celsius
Warranty	2 Year
Storage Temperature	10 - 20 Celsius
Storage Humidity	30 - 50%
