

Lagoon Treatment

Micronutrient Blend for Water Treatment

Lagoon Treatment contains a blend of microorganisms and micronutrients for the treatment of animal wastes. This formula boosts the biological activity in manure pits, lagoons to lower BOD, soften or eliminate the crust, and reduce solids. Lagoon Treatment also stabilizes the available nutrients for an improved fertilizer value through better uptake by crops.

Features

- Ensures rapid biological start-up
- Enhances and accelerates the biological digestion of animal wastes
- Reduces costs of manure pit maintenance and drainage
- Reduces formation of bad odors

Available In

50- 1/2 lb. Pouches Item #PLP503RP2

Directions for Use

Add .05 lbs per month per animal unit. Application rates and locations depend on manure dimensions and current biological conditions. Use in accordance with all Federal and State regulations. Results will depend upon site and climate conditions. Avoid extreme pH and temperature conditions.

Tech Specs

Bacteria Count	5 Billion CFU per gram
Bacterial Type	Non-pathogenic microbes
DSL	No
Color	Brown
Fragrance	None
Gram Negatives	Not present
pH	N/A
Temperature Range	20 - 40 Celsius
Warranty	2 Year
Storage Temperature	10 - 20 Celsius
Storage Humidity	30 - 60%
