Densifier Densifying Compound

Densifying Compound

Crete Rx™ Densifier is specially formulated with nanoparticle silicate to deeply penetrate and strengthen honed concrete surfaces. Once applied, treated surfaces demonstrate superior abrasion and wear resistance, as well as enhanced protection against chemicals. Ideal for restorative maintenance, Crete Rx Densifier should be used following the honing process to ensure long-lasting durability and performance.

Features

- Nanoparticle silicate technology
- Enhanced surface durability
- Improved abrasion resistance
- Superior chemical resistance

Available In

5 Gal. Pail Item #167105-00

Directions for Use

Use after the Betco Honing Tool to harden and prepare the floor for the Polish step. Apply Densifier at proper application rate with a flatmop, mop and bucket. Keep the surface wet for 15-20 minutes; re-applying in dry areas if necessary. After initial application time, allow floor to dry. Do not attempt to remove excess material.

Tech Specs

Coverage	2000 sq.ft./gal
Warranty	2 years
