

Crete Rx Step 1 Grind Tool, Blue, Genesys 28D

Crete Rx Step 1 Grind Tool, Blue

Quickly and effortlessly grind away light coatings, worn sealers, finishes, and surface wear from concrete and cementitious terrazzo floors. Achieve a uniform pattern across the entire floor for a smoother, more open texture. Best of all, you can accomplish this with a standard auto scrubber—no need to invest in a specialized, expensive concrete machine. Coverage: up to 300,000 sq ft per tool.

Features

Use with LiquiGrind to grind out imperfections in previously polished concrete
Prepares concrete for honing step by removing imperfections and smoothing surface

**Crete Rx Step 1 Grind Tool, Blue, DRS32BT Item
#E30029-00**

Directions for Use

The Crete Rx™ Polishing Tools are highly specialized for polishing concrete floors and must be used correctly to prevent tool, machine, or surface damage. Note: These tools are rotation-sensitive and must match the rotation direction of the floor machine (Clockwise CW

000 or Counter-Clockwise CCW000). Incorrect usage may lead to machine or tool failure.
