

Crete Rx™ Polishing Tool (3/case)

Crete Rx Polishing Tool

This polishing tool is designed for use with propane equipment and auto scrubbers. It pushes resin to fill concrete pores and build a gloss barrier. It establishes a beautiful polished look on the floor after the honing step in the Betco Crete Rx Honing and Polishing prescription pathway. This tool lasts approximately 200,000 square feet when used with an auto scrubber or 10,000 square feet when used with a polishing machine. It attaches to the machine via Velcro or magnetic tool holders.

Features

Used in the Polishing step of the Crete Rx System with propane equipment or autoscrubber
Establish a polished look on the floor after honing step completed in Crete Rx System

Available In

Crete Rx™ Polishing Tool (3/case) Item #E84134-00

Directions for Use

Remove Honing Tools from equipment and replace with Betco Crete Rx Polishing Tools. This step is to be done dry. If using propane equipment, one pass at roughly 15 to 20 ft./minute. Overlap each pass by roughly one quarter to ensure proper resin transfer. If using autoscrubber application, allow for six to ten passes at the same rate.
