

XL CATALYST

Catalyst/Hardener for two component products

XL Catalyst is used as the second component in various Basic Coatings products. XL Catalyst greatly improves the durability, adhesion and chemical resistance of two component finishes. XL Catalyst is available in 3 oz. and 13 oz. for gallon and five gallon pail applications.

Features

Available In

12 - 3 oz. in 4 oz. Bottles Item #B066217-12

12 - 13 oz. in 16 oz. Bottles Item #B066222-12

Directions for Use

While stirring, add the entire contents of this bottle to the 5 gallon pail of finish. Continue to stir for 30 seconds to blend. Stir or agitate gently to blend thoroughly. Allow to stand for 5 minutes before applying to finish. Refer to coating label for VOC information.
