

Stone, Tile, and Grout Penetrating Sealer (STG Sealer)

Stone, Tile, and Grout Penetrating Sealer

STG Penetrating Sealer is formulated with an innovative chemistry to penetrate and bond to all porous stone, tile, and grout surfaces. STG Penetrating Sealer provides cleaner looking floors for longer with superior protection from stains and soils. STG Penetrating Sealer is safe for all types of stone, tile, and grout floors.

Features

Semi-permanent protection from stain and soil embedment
Top in class stain resistance and durable for up to 1 year in high traffic applications
Effective on all types of tile, grout and natural stone surfaces
The original beauty of your floor will shine through as it does not change the floor's appearance

Available In

4 - 1 Gal. Bottles Item #168604-00

Directions for Use

Recommended for use on brick, ceramic tile, marble, grout, porcelain and quarry tile, slate, terrazzo, sand stone, limestone, concrete, quartz and travertine. All tile and stone must be cemented and grouted following cure times per manufacturer's directions prior to application of this penetrating sealer.

1. Clean surface with appropriate Betco industrial cleaner and allow to dry.
2. Apply liberally with clean synthetic mop, sponge or squeegee making sure all surfaces and grout are thoroughly saturated.
3. Allow sealer to dry 30 to 60 minutes depending on conditions. Apply second coat if necessary for more porous surfaces.
4. Do not allow foot traffic until completely dry.
5. Wet clean any residue 12 hours after application.

Tech Specs

Color (dry)	Clear
Color (liquid)	Water White
Coverage	2000 - 3000 square feet/gallon
