

Grease Solv Solid Degreaser

Solid Industrial Degreaser

Featured on Betco's GeneSys™ Auto Scrubber series, SoliChem™ Technology is the first on-board chemical dispensing system that uses solid chemicals. SoliChem™ delivers up to 80% lower daily cleaning costs than traditional liquid cleaners, and one solid makes 350 gallons of cleaning solution.

Grease Solv Solid is an industrial degreaser that rivals traditional degreasers with the added benefit of probiotics that aide in digesting organic material, creating fewer issues downstream.

Features

A high count non-pathogenic probiotics for better cleaning
Probiotic package that targets petroleum soils and other industrial organics
Use in industrial floor cleaning and degreasing
Contains aerobic and facultative anaerobic probiotics
Up to 80% lower cost versus traditional liquids
350 gallons of solution per solid
98% reduction in plastic packaging
88% reduction in freight weight

Available In

4 - SoliChem Solids Item #821E3-00

**8 - SoliChem Solids & Fortify Pucks Combo Pack
Item #92493E4000**

Directions for Use

Calculate your savings using the SoliChem™ [Savings Calculator](#)

Use only with Betco's GeneSys™ Scrubber:

1. Lift the top cap from the SoliChem™ system, then remove the internal cage.
2. Unwrap a solid and insert it into the center of the cage.
3. Place the cage back into the unit.
4. Replace the system's top cap and fill your auto scrubber with water only to begin cleaning.

Tech Specs

Dissolve Rate (assumes in SoliChem Technology System)	Approximately 350 gallons
Bacteria Count	Approximately 200 CFU per gallon
Bacteria Type	Non-pathogenic microbes
Foaming	Low
Fragrance	Rain Fresh
pH	9 - 10.5
Warranty	2 years
