

Foam Gun

Foam Gun for Dumpster Treatment

Produces a thick rich foam for extended contact time on vertical surfaces. No need to dilute the chemical yourself, uses metering tips so you will always get the right dilution. Just thread in a garden hose and it's ready to go!

Features

No need to manually dilute. Metering tips make sure you get the right dilution.

Use in conjunction with Dumpster Treatment for cleaning and deodorizing dumpsters and other trash receptacles. Convenient small size and lightweight gun.

Available In

Foam Gun Item #90273-00

Directions for Use

Unscrew foamer lid assembly from container. Press metering tip firmly into hose barb on the bottom of the lid assembly. For heavy soil use blue tip, and for medium soil use tan tip. Install the suction tube onto the hose barb. Fill the container with Dumpster Treatment. Screw foamer lid assembly securely onto container. Insert foamer lid assembly onto female quick connect in foamer nozzle. Connect a garden hose with 3/4" male garden hose thread to the base of the spray nozzle handle. Turn on the water supply to the hose. (Minimum 25 PSI water pressure is required to operate the foamer.) Grasp the foamer nozzle handle in one hand and foamer container in the other. Squeeze the nozzle handle to begin foaming. Continuous operation can be achieved by using the handle lock on the spray nozzle.

Applications

Dumpsters
Trash Chutes
Other Trash Receptacles
Loading Docks
