

Lagoon Pucks

Rapid Dissolve Waste Treatment

Lagoon Pucks are a biological solid specifically formulated for treating municipal, industrial and animal wastewater. Lagoon Puck combines concentrated bacterial strains specially selected for maximizing sludge reduction, accelerated waste digestion, and improved settling. The solid form allows for treatment of the entire lagoon system along with localized treatment of sludge islands and trouble spots.

Features

- Reduces sludge build-up and defers dredging costs
- Controls grease
- Improves settling and produces an excellent effluent
- Easy to handle and apply
- Reduces odors
- Ensures rapid biological start-up or reseeded after upsets

Available In

100- 4 Bags of 25/Pail- 2 1/2 in. x 4 oz. Blocks Item #PLS509P43

Directions for Use

For anaerobic and facultative lagoon systems, the application rate is based on the lagoon surface area:

Day 1 through Day 5, 20 lbs. per acre per day
 Day 6+ , 1 lb. per acre per week

Note: For problematic applications, contact your EnviroZyme technical representative for specific instructions.

Tech Specs

Bacteria Count	6 Billion CFU per gram
Bacterial Type	Non-pathogenic microbes
DSL	Yes
Color	Colorless
Fragrance	None
Gram Negatives	Not present
pH	6 - 9.5
Temperature Range	20 - 40 Celsius
Warranty	2 Year
Storage Temperature	10 - 30 Celsius
Storage Humidity	30 - 60%
