

Nitrifier

High Performance Nitrifiers - Americas (DSL)

Nitrifier is specially formulated with a proprietary blend of nitrifying microorganisms to provide a consistent seed of both types of nitrifiers for ammonia conversion. Selected strains of both Nitrosomonas spp. and Nitrobacter spp. are packaged at high concentrations to allow for the rapid reseedling of systems with ammonia issues.

Features

- Accelerates the establishment of nitrification in newly commissioned or seasonally operated plants
- Assists in the maintenance of satisfactory nitrification in plants with a history of inconsistent performance
- Avoids fines and surcharges for non-compliant effluent ammonia

Available In

1 - 16 oz. F-Style Bottle Item #ARL101FG1

1- 1.2 Gal. Bottle F-Style Item #ARL101G10

Directions for Use

Shake vigorously before adding.

Dosing rates are dependent on temperature, pH, and content of the wastewater. Please contact your EnviroZyme representative for application-specific dosing recommendations and a referral to a distributor.

Tech Specs

Bacteria Count	n/a
Bacterial Type	Non-pathogenic microbes
DSL	Yes
Color	Brown to Pink
Fragrance	Characteristic
pH	6 - 9.5
Temperature Range	16 - 35 Celsius
Storage Temperature	1 - 5 Celsius
Storage Humidity	30 - 60
