

# Compost Accelerant

## Nutrient Rich Soil Amendment

Compost Accelerant is a specially formulated blend of enzyme producing bacteria, nutrients and micronutrients that accelerate the natural compost degradation cycle.

With regular application, our Compost Accelerant will produce nutrient rich, soil improving humus in 6-9 weeks, even in large compost piles with increased temperature and lower levels of oxygen. Compost Accelerant is effective in accelerating almost all organic materials including, but not limited to: fruit and vegetable waste, yard waste (wood chips, lawn trimmings, grass clippings), manure, aquatic weeds (harvested), egg shells, and shredded newspaper.

## Features

Saves space  
 Makes composting more economical  
 Non-corrosive / Non-acidic

## Available In

**Bulk- 50 lbs. Item #WTP911P9**

## Directions for Use

Small Compost Piles: Mix 1 Tablespoon of product with water per bushel of waste and spray on compost heap.

Large Compost Piles: Mix 25 lbs. of product with water per 1000 cubic yards of waste and spray on compost heap.

\*Make sure to keep your compost heap moist and turn it regularly. Apply product every time heap is turned. Average turn is every 4-5 weeks. For faster results, turn every 2-4 weeks.

## Tech Specs

Bacteria Count	5 Billion CFU per gram
Bacterial Type	Non-pathogenic microbes
DSL	Yes
Color	Brown
Fragrance	None
Gram Negatives	Not present
pH	N/A
Temperature Range	20 - 40 Celsius
Warranty	2 Year
Storage Temperature	10 - 20 Celsius
Storage Humidity	30 - 60%
