

## Crete Rx Step 3 Polish Tool, Tan, DRS32BT

### Directions for Use

The Crete Rx™ Polishing Tools are highly specialized for polishing concrete floors and must be used correctly to prevent tool, machine, or surface damage. Note: These tools are rotation-sensitive and must match the rotation direction of the floor machine (Clockwise CW

000 or Counter-Clockwise CCW000). Incorrect usage may lead to machine or tool failure.

### Tech Specs

Coverage	up to 600,000 sq ft per tool
----------	------------------------------

Crete Rx Step 3 Polish Tool, Tan Achieve a flawless, mirror-smooth polish on concrete and cementitious terrazzo floors effortlessly. This tool refines and perfects the surface using a standard auto scrubber, producing a radiant and durable finish that will stand up to the test of time. Coverage: up to 600,000 sq ft per tool.

### Features

Used after the honing step with an autoscrubber to refine and perfect the surface  
Prepares concrete for Stain Defense step and burnishing for a highly polished floor
