

Pond Digester

Lactobacillus Based Bacterial Blend for Aquaculture

Pond Digester is a potent biological product specifically formulated for enhancing the biological component of aquaculture operations.

Pond Digester has been developed to involve multiple strains, selected for their ability to perform under both aerobic and anaerobic conditions, and to biodegrade organic material comprised of proteins, fats and carbohydrates. Blended with the required micronutrients, Pond Digester provides a complete formulation to digest organic material in order to control BOD, reduce sludge, and improve the health of the pond.

Features

- Ensures rapid biological start-up
- Controls floating debris
- Reduces odors
- Defers dredging costs

Available In

50- 1/2 lb. Pouches Item #WTP922RP2

Directions for Use

Mix the bacteria with a bucket of pond water and spread around the pond's perimeter.
 Initial dosage: 1 lb. per 2.5 acres of pond size applied one week before the fish or shrimp are placed into the pond.

Day 14 to 39: ½ lb. every 5 days per 2.5 acres
 Day 42 to 78: ½ lb. every 3 days per 2.5 acres
 Day 80 to 100: ½ lb. every 2 days per 2.5 acres
 Beyond 100 days: ½ lb. every day per 2.5 acres

Tech Specs

Bacteria Count	2 Billion CFU per gram
Bacterial Type	Non-pathogenic microbes
DSL	Yes
Color	Brown
Fragrance	None
Gram Negatives	Not present
pH	6 - 9.5
Temperature Range	20 - 40 Celsius
Warranty	2 Year
Storage Temperature	10 - 20 Celsius
Storage Humidity	30 - 60%
